OBSERVATION

The highest insurance claim seem to be coming from Bachelors degree holders, people who drive Grandpax and Mustang car models, Ford cars as well as Singles. The singles make up the group with the highest household income with a total of approximately 2.3B followed by the married with a total of 1.9B. There is only a slight increase of 0.2% in the insurance claims by the female gender as opposed to males.

Also, the insurance claims across the various coverage zones is similar with a slight variations between 0.1-0.6%.

Most of the customers fall within the ages 30-69years old, with the age bracket leading with a count of 7189. The least age bracket falls between 70-79 with a count of 3575, followed by ages 20-29 with a count of 5545.

With regards to the frequency of claims, customers with zero(0) number of claims makes the highest proportion.

The distribution of claims across the gender is insignificant. as there is very little difference.
